Education through Outdoor Learning

CTE Framework Sequence

Pathways to Education Careers

School and environmental and outdoor education employers struggle to find applicants with the skills needed to enter teaching and education fields.

PEI's Education through Outdoor Learning course sequence prepares the next generation to succeed in education through and with engaged, hands-on outdoor learning. Each course is designed to be taught in a way for students to pair class time with teaching practice at local schools or outdoor sites.

Standards Alignment:

- Designed for use in Career and Technical Education (CTE) programs
- Family and Consumer Science National Standards
- 21st Century Skills
- English Language Arts (ELA)
- Education and Training Career Cluster
- Recruiting Washington Teachers
