

Team Read Instructions and Template

Team reading breaks a lengthy bit of literature into bite-size portions or divides multiple informational resources equitably for efficient knowledge-gathering.

How to do it

1. Explore Teams divide content (one article or multiple sources) amongst themselves. High performing readers can take a larger part or more complex source to differentiate instruction.
2. Each student summarizes his or her source in one corner of the Team Read poster paper in one color of marker.
3. The Lab Tech writes a color-coded overall summary in the Summary Box.
4. The Science Communicator shares the summary with the class.
